This calculation is based on the assumption that each active customer purchases products worth a minimum of ₹2,500 per month.

- At this purchase level, a 5% awareness sharing contribution amounts to ₹125 per month per active customer, resulting in an annual income of ₹1,500 per active customer.
- As customer purchases increase over time to ₹5,000 per month per family, the annual awareness sharing contribution for the PIC will increase to ₹3,000 per active customer. For a base of 500 active customers, this translates into an annual income of ₹15,00,000.
- In addition, the PIC will receive a 10% performance incentive on the total awareness sharing contribution earned, amounting to ₹1,50,000.
- Therefore, the total annual earning potential for the PIC would be ₹16,50,000.
